

MUHAMMAD BESHER HAMZE

Location: Aleppo, Syria

Email: besherhamze97@gmail.com

GitHub: github.com/Besher-Hamze

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience in web and mobile application development. Proficient in NextJS, React, NestJS, Flutter, and various backend technologies. Skilled in integrating third-party APIs, implementing responsive designs, and database management. Demonstrated ability to deliver high-quality solutions across multiple platforms while adapting to evolving client requirements.

PROFESSIONAL EXPERIENCE

FullStack Developer

SveaSoft, Sweden (Remote) | August 2023 - March 2024

- Developed and maintained a freight logistics platform (FraktFinder) using NextJS for frontend and NestJS for backend development.
- Implemented multiple shipping provider integrations including UPS, DSV, DHL, and FedEx, enabling comprehensive shipping options for users.
- Created seamless integrations with business systems such as Shopify, Fortnox, Visma, Ongoing, and Microsoft Dynamics 365.
- Collaborated with cross-functional teams to optimize website performance and user experience.
- Participated in agile development processes including daily stand-ups, sprint planning, and code reviews.
- Maintained code quality through automated testing and continuous integration practices.

Mobile Application Developer

Freelance | 2020 - 2023

- Developed over 15 cross-platform mobile applications using Flutter for both Android and iOS platforms.
- Collaborated directly with clients to translate business requirements into functional applications.
- Implemented state management solutions using Provider and Bloc for optimal app performance.
- Integrated RESTful APIs and Firebase for real-time data management and storage.

- Deployed applications to Google Play Store and Apple App Store, managing the entire release cycle.

Web Developer

Freelance | 2022 - 2023

- Built responsive and interactive websites using React, integrating various libraries for enhanced functionality.
- Developed backend services using Node.js/Express.js and Spring Boot for seamless user experiences.
- Implemented database solutions using both SQL and NoSQL databases for scalable web applications.
- Utilized modern CSS frameworks including Tailwind and Bootstrap for responsive designs.

Software Development Trainer

AnyCode | 2022 - 2023

- Conducted training sessions for aspiring developers in mobile and web development technologies.
- Mentored junior developers, improving their coding skills and project management abilities.
- Created comprehensive learning materials and coding exercises for students.

Deep Learning & Machine Learning Specialist

Freelance Projects | 2021 - 2023

- Developed AI models using TensorFlow, Keras, and Scikit-learn for various business applications.
- Implemented data preprocessing workflows and model training pipelines to ensure high prediction accuracy.
- Integrated machine learning models into mobile and web applications to enhance functionality.

EDUCATION

Bachelor of Computer Engineering

Aleppo University, Syria | 2019 - 2024

TECHNICAL SKILLS

- **Frontend:** NextJS, React, JavaScript, TypeScript, HTML5, CSS3, Tailwind, Bootstrap

- **Backend:** NestJS, Node.js, Express.js, Spring Boot, RESTful APIs, GraphQL
- **Mobile:** Flutter, Dart
- **Databases:** SQL, NoSQL (MongoDB, Firebase)
- **DevOps:** Git, GitHub, Docker, Jenkins
- **AI/ML:** TensorFlow, Keras, Scikit-learn, Python
- **Other:** System Integrations, API Development, Authentication/Authorization

NOTABLE PROJECTS

FraktFinder (SveaSoft) - Freight logistics platform that connects users with multiple shipping providers across Sweden and internationally.

- Technologies: NextJS, NestJS, TypeScript
- Features: Multi-carrier shipping integration, business system connections, user management

Spark Platform (Graduation Project) - Mobile application offering adaptive cognitive development games.

- Technologies: Flutter, Firebase, Machine Learning
- Grade: 99/100
- Features: Dynamic difficulty adjustment based on user performance

E-Mall - E-commerce mobile application for the Syrian market published on Google Play Store.

- Technologies: Flutter, Node.js, MongoDB
- Features: Product browsing, order management, secure payment integration

LANGUAGES

- **Arabic:** Native
- **English:** Professional working proficiency
